Findings and recommendations:

The issue requires a systematic and systemic approach; however, change can also be achieved within the institution by:

- improving cooperation between the professors, librarians and principals at the Celje School Centre;
- devoting more attention to literacy in every school subject;
- establishing a group tasked with devising standard guidelines for seminar papers and other written work;
- organising an hour of direct contact between the adult educators at the library;
- conducting research among employers, together with the Celje Regional Office of the ESS, to determine the education needs of their employees.
